

Amrit Pal Singh

Full Stack Web Developer

PROFESSIONAL SUMMARY

Proactive and proficient Full Stack Web Developer adept in HTML, CSS, JavaScript, and MERN stack technologies including MongoDB, Express.js, React.js, and Node.js. Skilled in collaborative teamwork and problem-solving. Capable of leveraging Generative AI and swiftly mastering new tech stacks for innovation.

PROJECTS

1. Trave-Trakkers | |

JavaScript | React | Chakra-UI | JSON-server |

react-bootstrap | CSS3

- Collaborated with a team of four to develop a travel booking web application using React.js and Chakra-UI.
- Implemented user authentication and form validation to ensure secure and accurate user data handling.
- Created dynamic tour cards by fetching and rendering data from a JSON-server backend.
- Designed a user-friendly dashboard for managing tour bookings and reviews.
- Developed pagination for tours to enhance user experience and optimize data display.
- Implemented CRUD operations on the backend server to maintain comprehensive tour management functionality.
- Enabled users to add tours to a cart and book them seamlessly through an integrated booking system.

2. Frank-and-Oak | |

JavaScript | HTML5 | Responsive Web Design | CSS

- Developed the Men section with robust search and filter functionalities using JavaScript.
- Implemented pagination for improved data handling and user navigation.
- Enhanced user experience with responsive design techniques ensuring compatibility across devices.
- Integrated backend data with frontend components to enable dynamic card creation and display.
- Designed and maintained CRUD operations on JSON server ensuring seamless data management.
